Introduction of Our Company

We would like to introduce our self as VIRTUAL WORLD COMMUNICATIONS. is established in 2012 to focus on basics of Customers Security Surveillance Solution, IT Structure and Web Solutions. Our Company name can define the Communications between Real World to Virtual World. Our office is located in Karachi, but providing services to Major Cities of Pakistan. We provide All Services in 24 by 7 (Day & Night) and Online Support to our Customers. Our Motive is to satisfy our Client with Best Products & Services on one Call. We provide solutions to fulfill and satisfy our clients with their need.

Why Choose us ?

We assure that with our state of the art and technical approach towards your needs, we will be able to make you join our growing list of satisfied customers. Assurance of providing the best customized technical solutions and services keeping in view the economic viability of our customers and supply of equipment through our global network of business associates, identify our market position.

Maintenance and Servicing Capabilities

VWC has a standard call-out procedure for each system installed with 24-hour service. VWC endeavor to respond telephonic-ally within the hour and on site within 24 hours of being notified. Qualified and trained technicians would respond to the specific project with the necessary tools and stock to attend to the fault(s), should the system require additional spares, these would be obtained within the shortest time required. Servicing of equipment is carried out by VWC in-house capabilities. VWC undertakes after sales service agreements and pride in the in-depth knowledge of its product base with central documentation for each project undertaken. Quality is an element of the attitudes of our technicians that has been carefully nurtured and is evident in the compliments received from clients.

Our Vision

We businesses primarily focus on developing and providing systems that facilitate and manage transactions between businesses and their customers. We provide both hardware and software components that handle payment processing, inventory management, customer relationship management, and sales reporting.

A.I in Banks

AI is transforming education by offering personalized learning experiences, automating administrative tasks, and providing new tools for both Customers and Employees . AI can detects customer's Face Expressions along with avoid robbery at early stage and help out the Security of Bank to approach immediately. AI also helps in Access Control System with Attendance and rest of operations smartely.
